Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Appellant argues on page 1 that a new ground of rejection on appeal is raised based on RFC-2381.

In response, there is no new ground of rejection based on RFC-2381. Examiner is stating the facts that applicant's invention is well known and common in the art as clearly disclosed by well known standard, RFC-2381.

Appellant argues on page 1 that the appellant does not presently have a copy of the standard (RFC-2381).

In response, according to the official record, the examiner has already cited RFC-2381 was attached to office action mailed on 9/10/03 to the appellant. Examiner has also verified that attached RFC-2381 document is viewable in the electronic form from PAIR system by the appellant. Since the RFC-2381 document has already provided to the appellant which is part of the prosecution history, there is no need for the examiner to provide another.

The reply brief filed 12/28/08 has been entered and considered. The application has been forwarded to the Board of Patent Appeals and Interferences for decision on the appeal.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Ian N. Moore/
